PROFILE

Full Stack Developer skilled in CSS, HTML, JavaScript, React.js, and Node js.

Experienced in creating user-friendly web applications and efficient backend systems.

Strong team player committed to delivering quality software solutions.

SKILLS

Programming Languages: Highly proficient in Python, C, Java, Php,TypeScript and JavaScript.

Web Development: Highly proficient in HTML, CSS,Tailwind CSS and React.js for web development.

Backend Development: Next Js, Node Js and express Js for backend development

Databases: Proficient in SQL; experienced with Supabase,firebase, and database optimization (stored procedures, indexing, triggers)

Version Control & Collaboration: Proficient in Git; experience working on team projects and managing repositories

Artificial Intelligence: Experience building AI-driven chatbots.

Cloud & Infrastructure: Hands-on experience with Supabase,firebase and AWS.

PROJECTS

ThinkLink (Team Project): Collaborated in developing an AI-powered interactive learning platform that enhances video-based education. Worked on key features such as user authentication, video analysis, and an AI chatbot using Laravel, Supabase, and OpenAI.

Care4Pets Clinic : Designed and implemented a structured database system to manage spaceships, crew members, missions, and cargo logistics. Developed stored procedures, triggers, and indexing strategies to optimize database performance and ensure data integrity.

Chatbot : Developed an AI-powered chatbot using Groq and Python

Spaceship Management System (Team Project): Designed and implemented a structured database system to manage spaceships, crew members, missions, and cargo logistics. Developed stored procedures, triggers, and indexing strategies to optimize database performance and ensure data integrity.

Personal Portfolio : Modern, responsive portfolio highlighting design skills and interactive features with smooth UI/UX.

Pizza Shop (Front-end) : developed a responsive pizza shop website using html,css and javascript.

Volunteer Experience

Web Developer & Event Contributor
Google Developer Groups (GDG) – Lebanese University | October 2024 – July 2025

Supported tech initiatives through hands-on web development mentorship and event organization. Engaged with students in practical learning sessions, helping them build real-world projects using modern technologies**.**

Tech Day – Web Development Mentor: Served on the web dev team, guiding students in building personal portfolios using Next.js. Delivered walkthroughs on routing, components, and deployment. Helped attendees deploy live portfolios and understand core frontend concepts.

Dev Fair Organization: Contributed to organizing the university's DevFair, a career-focused event that connected students with over 16 companies and domain experts. Provided technical assistance at the event and supported students in presenting their skills through web-based projects.

EDUCATION

Bachelor of Science in Computer Science, Lebanese University - Faculty of Sciences

2022 – Expected graduation 2025
